

Implementing a Novell Open Enterprise Server 2

Varighet: 5 Days **Kurskode: N3089**

Beskrivelse:

Implementing Novell Open Enterprise Server 2 for Linux (course 3089) is designed to provide hands-on experience using the Linux platform to host Novell Open Enterprise Server 2 services. This course should reduce the fear of migrating to Linux the services currently running on NetWare.

Målgruppe:

The audience for this course is the community of NetWare Certified Novell Engineers (CNEs) who are interested in moving, or are planning to move, their servers from NetWare to Novell Open Enterprise Server 2 or are planning to add Novell Open Enterprise Server 2 servers to their existing network.

It is assumed that the audience for this course is interested in obtaining the Novell Certified Engineer (NCE) Enterprise Services certification.

Agenda:

- Understand the basics of the Novell Open Enterprise Server 2 Linux server platform
 - Install a new Novell Open Enterprise Server 2 Linux server.
 - Perform basic server administration of an Novell Open Enterprise Server 2 Linux server.
 - Perform basic server configuration tasks on an Novell Open Enterprise Server 2 Linux server.
 - Install and configure Novell Open Enterprise Server services on an Novell Open Enterprise Server 2 Linux server.
 - Maintain Novell Open Enterprise Server services on a Novell Open Enterprise Server 2 Linux server.
-

Forkunnskaper:

Students in this course should be current NetWare 6 or Novell Open Enterprise Server NetWare CNEs, or have equivalent experience with the NetWare 6, 6.5, or Open Enterprise Server for NetWare product. This includes strong experience with the following:

Test og sertifisering

This course prepares you to take the Novell Certified Engineer Enterprise Services (Novell NCE Enterprise Services) certification exam (050-709).
